

Captain Gene Quigley on the Leviathan Lines

“.....Fighting Tuna and Billfish on the fly is no easy task, make one mistake and you're out of the game. Offshore fly fishing requires fly lines to be constructed of strong mono cores, and fast tapers to deliver large flies to extremely fast pelagic game fish. The heavy head on the various Leviathan fly Lines loads twelve to sixteen weight fly rods and delivers large flies quickly and accurately to breaking tuna. Additionally, the 72 pound Powerflex core allows my clients to put everything into the fight while knowing the line won't fail.”

Weather your casting surface poppers to Marlin and Dorado in tropical waters, or delivering flies to 100 Pound Bluefin Tuna on the Northeast, the Leviathan lines always get the job done.”
