

### **Captain Tom Rowland on Powerflex® Core Lines**

“My favorite time of the year in the Florida Keys is May-October: translation, I like the hottest months of the year. Bonefish, Tarpon, Permit and Redfish become spooky and require long and precise casts. Fly lines with a soft core tangle like linguini and drive me crazy. Jim Vincent and I discussed this problem and he sent me a Powerflex Core line to try. The stiff core is easily stretched, relieving all memory and the line never tangles even under the hottest conditions. Spool one on, stretch it out and rip some lips!”
