

### **Captain Sarah Gardner on the Striper Lines**

*“Multi talented is my best description for RIO’s Striped Bass Fly Line family. These workhorses are capable of launching a variety of unwieldy flies in difficult conditions. The Clouser style taper also allows my novice anglers to feel this line load the rod, reducing their false casting while increasing their casting distance. The slick shooter coating has good feeling in the hand and wont slip from your fingers when shooting line or setting hooks. Best of all, Striped Bass lines are super durable and require little “TLC” during a long and abusive charter season. They have even survived close encounters with outboard motor props and lived to cast again!”*
